Architects**  
Los Angeles

## ABOUT US

Forward Architects is a medium-sized, full-service architecture firm that operates out of an art districts warehouse in Los Angeles, CA. The firm specializes in residential architecture in a variety of scales along with a multitude of civic and cultural projects to boast in its portfolio. One of the main philosophies of the firm's practice is a well-rounded design experience that covers all aspects of both the architectural exterior and interior.

## WHY CHOOSE US?

The firm boasts an extensive fabrication studio that allows designers to work with clients on one-off furniture or sculptural pieces that integrate architectural design elements used on the exterior of the project and replicate them on a smaller more intimate scale within the structure.
